(B) the alternatives for disposition of the power output of the dam facilities, including wholesale and retail sales within and outside the State and use of the power within a portfolio to support advanced and renewable energy technologies, and the impacts of these alternatives on the credit-worthiness of the State and the ability of Vermont utilities to access investment capital on reasonable commercial terms.

(2) Prepare recommendations on the purchase of the dam facilities.

(d) Assistance. The Working Group may consult with other State, municipal, or private entities, including representatives of the State Treasurer; the Vermont Agency of Natural Resources; the Vermont Municipal Bond Bank; representatives of existing municipal, cooperative, and investor-owned utilities; the Vermont Department of Public Service; and, where appropriate, the Public Service Board. (4) to lessen electricity price risk and volatility for Vermont ratepayers and to increase system reliability;

(5) to not compete with Vermont utilities;

(6) to ensure that the credit rating of the State will not be adversely affected and Vermont taxpayers will not be liable should the purchase of the facilities fail because of the failure to produce sufficient revenue to service the debt, the failure of a partner, or for any other reason; and

* * * Telecommunications Siting; Local Input; Collocation * * *

Sec. 5a. 30 V.S.A. § 248a is amended to read:

§ 248a. CERTIFICATE OF PUBLIC GOOD FOR COMMUNICATIONS FACILITIES

(a) Certificate. Notwithstanding any other provision of law, if the applicant seeks approval for the construction or installation of telecommunications facilities that are to be interconnected with other telecommunications facilities proposed or already in existence, the applicant may obtain a certificate of public good issued by the Public Service Board under this section, which the Board may grant if it finds that the facilities will promote the general good of the State consistent with subsection 202c(b) of this title. A single application may seek approval of one or more telecommunications facilities. An application under this section shall include a copy of each other State and local permit, certificate, or approval that has been issued for the facility under a statute, ordinance, or bylaw pertaining to the environment or land use.

(b) Definitions. As used in this section:

(1) "Ancillary improvements" means telecommunications equipment and site improvements that are primarily intended to serve a telecommunications facility, including wires or cables and associated poles to

connect the facility to an electric or communications grid; fencing; equipment cabinets or shelters; emergency backup generators; and access roads.

(2) “De minimis modification” means the addition, modification, or replacement of telecommunications equipment, antennas, or ancillary improvements on a telecommunications facility or existing support structure, whether or not the structure was constructed as a telecommunications facility, or the reconstruction of such a facility or support structure, provided:

(A) the height and width of the facility or support structure, excluding equipment, antennas, or ancillary improvements, are not increased;

(B) the total amount of impervious surface, including access roads, surrounding the facility or support structure is not increased by more than 300 square feet;

(C) the addition, modification, or replacement of an antenna or any other equipment on a facility or support structure does not extend vertically more than 10 feet above the facility or support structure and does not extend horizontally more than 10 feet from the facility or support structure; and

(D) the additional equipment, antennas, or ancillary improvements on the support structure, excluding cabling, does not increase the aggregate surface area of the faces of the equipment, antennas, or ancillary improvements on the support structure by more than 75 square feet.

(3) “Good cause” means a showing of evidence that the substantial deference required under subdivision (c)(2) of this section would create a substantial shortcoming detrimental to the public good or State’s interests in section 202c of this title.

(4)(A) “Limited size and scope” means:

(i) A new telecommunications facility, including any ancillary improvements, that does not exceed 140 feet in height; or

(ii) An addition, modification, replacement, or removal of telecommunications equipment at a lawfully constructed telecommunications facility or on an existing support structure, and ancillary improvements, that would result in a facility of a total height of less than 200 feet and does not increase the width of the existing support structure by more than 20 feet.

(B) For construction described in subdivision (3)(A) of this subsection to be of limited size and scope, it shall not disturb more than 10,000 square feet of earth. ~~For purposes of~~ As used in this subdivision, “disturbed earth” means the exposure of soil to the erosive effects of wind, rain, or runoff.

(5) “Substantial deference” means that the plans and recommendations referenced under subdivision (c)(2) of this section are presumed correct, valid, and reasonable.

~~(4)~~(6) “Telecommunications facility” means a communications facility that transmits and receives signals to and from a local, State, national, or international network used primarily for two-way communications for commercial, industrial, municipal, county, or State purposes and any associated support structure that is proposed for construction or installation which is primarily for communications purposes, and any ancillary improvements that are proposed for construction or installation and are primarily intended to serve the communications facilities or support structure. An applicant may seek approval of construction or installation of a telecommunications facility whether or not the telecommunications facility is attached to an existing structure.

~~(5)~~(7) “Wireless service” means any commercial mobile radio service, wireless service, common carrier wireless exchange service, cellular service, personal communications service (PCS), specialized mobile radio service, paging service, wireless data service, or public or private radio dispatch service.

(c) Findings. Before the Public Service Board issues a certificate of public good under this section, it shall find that:

(1) The proposed facility will not have an undue adverse effect on aesthetics, historic sites, air and water purity, the natural environment, and the public health and safety, and the public’s use and enjoyment of the I-89 and I-91 scenic corridors or of any highway that has been designated as a scenic road pursuant to 19 V.S.A. § 2501 or a scenic byway pursuant to 23 U.S.C. § 162, with due consideration having been given to the relevant criteria specified in 10 V.S.A. §§ 1424a(d) and 6086(a)(1) through (8) and (9)(K). However, with respect to telecommunications facilities of limited size and scope, the Board shall waive all criteria of this subdivision other than 10 V.S.A. § 6086(a)(1)(D)(floodways) and (a)(8)(aesthetics, scenic beauty, historic sites, rare and irreplaceable natural areas; endangered species; necessary wildlife habitat). Such waiver shall be on condition that:

(A) the Board may determine, pursuant to the procedures described in subdivision (j)(2)(A) of this section, that a petition raises a significant issue with respect to any criterion of this subdivision; and

(B) a telecommunications facility of limited size and scope shall comply, at a minimum, with the requirements of the Low Risk Site Handbook for Erosion Prevention and Sediment Control issued by the Department of Environmental Conservation, regardless of any provisions in that handbook that limit its applicability.

(2) Unless there is good cause to find otherwise, substantial deference has been given to ~~the land conservation measures in~~ the plans of the affected municipalities ~~and; to the recommendations of the municipal legislative bodies and the municipal and regional planning commissions regarding the municipal and regional plans, respectively;~~ and to the recommendations of the regional planning commission concerning the regional plan. Nothing in this section or other provision of law shall prevent a municipal body from basing its recommendations to which substantial deference is required under this subdivision (2) on an ordinance adopted under 24 V.S.A. § 2291(19) or bylaw adopted under 24 V.S.A. chapter 117 by the municipality in which the facility is located. A rebuttable presumption respecting compliance with the applicable plan shall be created by a letter from an affected municipal legislative body or municipal planning commission concerning compliance with the municipal plan and by a letter from a regional planning commission concerning compliance with the regional plan.

(3) If the proposed facility relates to the provision of wireless service, the proposed facility reasonably cannot be collocated on or at an existing telecommunications facility, or such collocation would cause an undue adverse effect on aesthetics.

(A) If a proposed new support structure for a new telecommunications facility that provides wireless service will exceed 50 feet in height in a cleared area or will exceed 20 feet in height above the average treeline measured within a 100-foot radius from the structure in a wooded area, the application shall identify all existing telecommunications facilities within the area to be served by the proposed structure and, for each such existing facility, shall include a projection of the coverage and an estimate of additional capacity that would be provided if the applicant's proposed telecommunications equipment were located on or at the existing facility. The applicant also shall compare each such projection and estimate to the coverage and capacity that would be provided at the site of the proposed structure.

(B) To obtain a finding that a proposed facility cannot reasonably be collocated on or at an existing telecommunications facility, the applicant must demonstrate that:

(i) collocating on or at an existing facility will result in a significant reduction of the area to be served or the capacity to be provided by the proposed facility or substantially impede coverage or capacity objectives for the proposed facility that promote the general good of the State under subsection 202c(b) of this title;

(ii) the proposed antennas and equipment will exceed the structural or spatial capacity of the existing or approved tower or facility, and the existing or approved tower or facility cannot be reinforced, modified, or replaced to accommodate planned or equivalent equipment, at a reasonable

cost, to provide coverage and capacity comparable to that of the proposed facility;

(iii) the owner of the existing facility will not provide space for the applicant's proposed telecommunications equipment on or at that facility on commercially reasonable terms; or

(iv) the proposed antennas and equipment will cause radio frequency interference that will materially impact the usefulness of other existing or permitted equipment at the existing or approved tower or facility and such interference cannot be mitigated at a reasonable cost.

* * *

(e) Notice. No less than 45 60 days prior to filing an application for a certificate of public good under this section, the applicant shall serve written notice of an application to be filed with the Board pursuant to this section to the legislative bodies and municipal and regional planning commissions in the communities in which the applicant proposes to construct or install facilities; the Secretary of Natural Resources; the Secretary of Transportation; the Division for Historic Preservation; the Commissioner of Public Service and its Director for Public Advocacy; the Natural Resources Board if the application concerns a telecommunications facility for which a permit previously has been issued under 10 V.S.A. chapter 151; and the landowners of record of property adjoining the project sites. In addition, at least one copy of each application shall be filed with each of these municipal and regional planning commissions.

(1) Upon motion or otherwise, the Public Service Board shall direct that further public or personal notice be provided if the Board finds that such further notice will not unduly delay consideration of the merits and that additional notice is necessary for fair consideration of the application.

(2) On the request of the municipal legislative body or the planning commission, the applicant shall attend a public meeting with the municipal legislative body or planning commission, or both, within the ~~45-day~~ 60-day notice period before filing an application for a certificate of public good. The Department of Public Service shall attend the public meeting on the request of the municipality. The Department shall consider the comments made and information obtained at the meeting in making recommendations to the Board on the application and in determining whether to retain additional personnel under subsection (o) of this section.

(3) With the notice required under this subsection, the applicant shall include a written assessment of the collocation requirements of subdivision (c)(3) of this section, as they pertain to the applicant's proposed telecommunications facility. On the request of the municipal legislative body or the planning commission, the Department of Public Service, pursuant to its authority under subsection (o) of this section, shall retain an expert to review

the applicant's collocation assessment and to conduct further independent analysis, as necessary. Within 45 days of receiving the applicant's notice and collocation assessment, the Department shall report its own preliminary findings and recommendations regarding collocation to the applicant and to all persons required to receive notice of an application for a certificate of public good under this subsection (e).

* * *

(h) Exemptions from other law.

(1) An applicant using the procedures provided in this section shall not be required to obtain a permit or permit amendment or other approval under the provisions of 24 V.S.A. chapter 117 or 10 V.S.A. chapter 151 for the facilities subject to the application or to a certificate of public good issued pursuant to this section.
